For Use in Organic Production

Delivering Organic Nutrients

Oilseed extract provides Nitrogen (Water soluble & insoluble), Phosphoric Acid and Potash and essential micronutrients including calcium and magnesium, plus beneficial organic compounds found in nutrient-rich seeds. Plus, this sustainable alternative to synthetic plant food is GMO-Free.

Feeding with Organic 3-1-1

Proper preparation and protocol is required due to its organic nature. Agitate/mix product prior to each use. Flush your lines with a sanitizing solution that is approved for this purpose in certified organic greenhouses. As with any organic solution, airborne organisms may colonize on the surface of the stock tank solution. Note below the preventative options we recommend:

- Mix only enough stock solution as can be used in a few days

Pathogen Free - Heavy Metals Free
