

# Nature's Source® Organic Plant Food 3-1-1

**Nature's Source Organic Plant Food 3-1-1**  
is the perfect choice for the time  
challenged organic home gardener.

**Effective.** Ideal for all organic gardens. Good for everything a home gardener grows, indoors and out. Nature's Source is complete plant nutrition.

**Appealing.** This liquid concentrate has no offensive odor. A Natural, earthy scent.

**Convenient.** Nature's Source is easy to mix and use with the no-mess dosing pump.

Made from oilseed extract, a renewable source of plant nutrition which contains "Boost Molecules" (amino acids) known to improve overall plant health! Feeds the plant and the soil for a healthy growing environment of beneficial microorganisms which promote strong root development. **Plus, it's GMO-Free!**

**Bring out the best in everything you grow.**

# Natural Nutrition from Seeds

## INFORMATIONAL GUIDE

Nature's Source Organic Plant Food starts with Natural Nutrition from oilseeds, which contains essential nutrients, vitamins and amino acids, for optimum plant growth.

This natural source makes it safe and gentle for feeding all your plants with just one formulation. This includes tender, delicate plants that can be sensitive to salts in many fertilizers, both organic and synthetic. When used as directed, it will not burn your plant.

Whether you want more flowers with vibrant color or more harvest and enhanced flavor from your fruits and vegetables – Nature's Source provides a Complete, Natural Nutrition Source.

House Plants: Just 3 pumps of Organic Plant Food in 1 Gallon of water

Outdoor Gardens: 5 pumps of Organic Plant Food in 1 Gallon of water

## USAGE TIPS

### Potted Plants/Patio Plants:

- Be sure you start with a good growing media that provides good air porosity. Water in when repotting with Nature's Source by putting 5 pumps or 2 TBL (25 ML) In your one gallon (3.7 L) watering can. Continue feeding at the same rate every 7-10 days for optimum plant quality and beautiful blooms and harvest.

### House Plants:

- Typical houseplants are light feeders and 3 pumps or 1 TBL (15 ML) in your one gallon (3.7 L) watering can for the optimum rate. House plants can be fed every time you water, since watering is less frequent for indoor plants.
