

## Grow Program: Geraniums

**The Nature's Source Difference:** Nature's Source plant foods are high efficiency nutrition formulated with oilseed extract, an all-natural and renewable source of plant nutrition. The low salt formulations enhances nutrient uptake by the plant.

### Feeding Recommendations

---

***Occasional Feed Program:*** Beginning from day of sticking URCs or transplanting, water them in with Nature's Source 10-4-3 or 10-4-5 at a rate of 250 ppm and Plant Probiotic at a rate of ¼ lb. per 50 gallons. Then feed 2 to 3 times per week at 300 - 350 ppm. Geraniums need fed at least 2 times a week, so when media is too wet to feed or water, apply at above rates as a foliar spray to continue providing nutrients for optimum development.

Nature's Source Foliar Essentials can be applied starting in propagation and on through the growing cycle of the crop. This application encourages a more compact growth habit with increased tone and enhanced nutrient uptake. Apply at a rate of 1 gallon per 100 gallons of water (1 oz. per gallon) every 7-10 days, as needed.

***For Growers who prefer Constant Feed:*** Feed with Nature's Source 10-4-3 or 10-4-5 at 250 ppm.

***Nature's Source Benefits:*** Geraniums grown with Nature's Source can be watered according to plants' needs for faster root development, since you do not have to worry about salt build up. Geraniums grown with Nature's Source will be full of energy and nutrition without salt stress for improved transplant success.

***Many Growers report*** more toned, compact plants with enhanced zonal distinction. They also see the larger more vibrant blooms, with dark green foliage for earlier – ready to market.
