

Research Publication: Organic Bioponics – Bell Peppers

Comparison Trial

Leamington, Ontario Canada

TESTING

1. Utilize irrigation solution at transplant with Nature's Source® Organic 3-1-1 mixed at 1:100 to bridge the nutrient delay of grower standard media incorporated nutrients.
2. Comparison of Nature's Source® Organic 3-1-1 applied at 1:100 during irrigation vs. grower standard of clear water irrigation with dry top dress.

RESULTS SUMMARY

1. Irrigation solution at transplant provided a bridge to the nutrient delay of standard media incorporated nutrients
 - Crops exhibited stronger initial growth with nutrient enriched Nature's Source Organic 3-1-1 transplant solution
2. Confirmed nutrient requirements are met with liquid Nature's Source Organic 3-1-1 only
 - Management of the nutrient requirements for the crop was simplified
 - The economic advantage of eliminating the labor cost to top dress granular nutrients was realized
